

Court Insights

Court Insights is a self-service data exploration environment that surfaces operational performance insights from your case management data. With Court Insights, you can easily find the information you need to understand existing problems, set alerts and benchmarks that help you track issues, and create strategic approaches to improving performance. Accessing this information in a dynamic, flexible format allows you to have data-driven conversations based on up-to-date case management information, ensuring that your approach stays relevant as circumstances change. Court Insights supports you in creating shared understanding among stakeholders in the justice system and in the community so you can reach the right conclusions together more quickly, and validate those decisions based on objective, nationally recognized measures and reliable data sources. Court Insights utilizes the capabilities of the Socrata cloud platform, a data visualization tool that enables users to derive quality insights through data analysis and code mappings from Odyssey®.

TURN YOUR ODYSSEY DATA INTO AN OPERATIONAL ASSET

A statewide view of Clearance Rate (please note: data shown is synthetic).

Court Insights presents your data through four of the CourTools measures developed by the National Center for State Courts: clearance rate, time to disposition, age of active pending caseload, and trial date certainty.

FEATURES

- Set targets and benchmarks within Court Insights in order to communicate your goals and standards across your entire organization.
- Proactive alerts allow you to set customizable notifications that reach out to you when (for example) your case backlog is growing quickly or your time to disposition for a specific case category is rising.
- Customized dashboards allow each employee to create a personalized data portal that only shows them information that's relevant for their work. Dashboards can also be created centrally, allowing administrators to manage the information available to each role within a court system.
- Visualization options allow staff to easily move between viewing data in bar charts, histograms, choropleth and heat maps, over time charts, and detailed table views.
- Download and export spreadsheets of underlying data for further analysis or visualizations for reports or presentations.
- Share data within Court Insights by sending visualizations, reports, or dashboards to peers.
