ENFORCEMENT MOBILE *powered by Brazos*

Electronic Citation Module

REDUCE TIME ON TRAFFIC STOPS

Speed through the ticketing process with auto-fill and data transfer capabilities

MAXIMIZE VALUE

Use existing law enforcement and court applications with Enforcement Mobile

ELIMINATE ERRORS

With digital ticketing entry, legibility issues become a thing of the past and dismissal rates are reduced

---

Tyler Technologies' Enforcement Mobile solution, powered by Brazos, offers an electronic citation module that is the most technologically advanced in the market.

Rather than writing citations by hand, which requires re-entry into court and law enforcement records management systems, officers using Enforcement Mobile enter citation information directly from an electronic device. This data is then automatically uploaded into the agency's system.

Enforcement Mobile runs on any device with an Android, iOS, or Microsoft® operating system, such as MDCs, PDAs, or cell phones. This flexibility allows each agency to tailor the solution to maximize the value of investments in hardware and software.
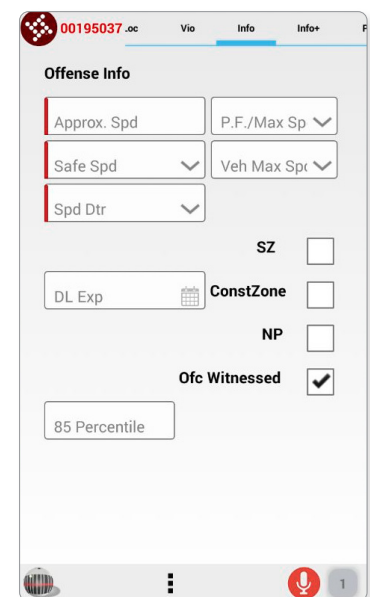

Enforcement Mobile provides the back-end data collection and reporting capabilities in both hosted and locally installed models to accommodate the needs of agencies of all sizes. Users can change the look and feel of the screens, add new users and devices, customize ticket printouts, and more.

KEY FEATURES:

- Entire application is 100% tailored to each agency
- Operates on any device with an Android, iOS, or Microsoft® operating system (MDC, PDA, cell phone, etc.)
- Auto-fills suspect information from any DL or query return
- Auto-fills vehicle information from VIN, registration sticker, and/or query returns
- Provides complete citation, statistical, and mapping reports
- Integrates with any law enforcement records management system, court, or custom application
- Synchronizes the device over 802.11 a/b/g, cellular, or batch connections
- Includes optional hosted or installed back-end collection and reporting

BENEFITS:

- Increases officer and violator safety
- Reduces data entry errors on citations
- Eliminates data entry into court and public safety systems
- Reduces total cost of processing citations
- Requires minimal IT support

Easily enter and view offense data

Eliminate errors and legibility issues with easy data entry capabilities

EASE OF OPERATION

Since all screens and ticket layouts are tailored to each agency, officers will recognize the fields and quickly adopt the technology. Many data entry options speed up the process of filling out the citation, including:

- Interface with existing mobile query software (NCIC returns)
- Read the 2D driver's license barcodes and magstripes
- Read VINs and registration stickers
- Pre-load streets, offenses, and many other fields
- Configure business rules to prevent saving or printing incomplete citations
- Automatically calculate court/arraignment dates

AVAILABLE MODULES

- Parking Citations and Warnings
- Accident/Crash Reporting
- Towed Vehicle Reports
- Field Interviews
- K9 Tracking

- Criminal Trespass Warnings
- Daily Activity Reports
- Code Enforcement
- Animal Control

Digitize any existing paper form with Brazos

A TRUSTWORTHY, LONG-TERM PARTNER

Tyler delivers world-class solutions and is committed to partnering with clients. When agencies purchase software solutions from Tyler, they receive the benefit of perpetual upgrades as they happen without additional license fees.
