

ENTERPRISE CORRECTIONS: SAFE, SECURE DEPOSIT KIOSK SOLUTION

Tyler Technology's Enterprise Corrections offers a corrections-grade standard 5-foot free-standing deposit kiosk equipped to accept cash and credit/debit card deposits 24/7. Enterprise Corrections' deposit kiosk is a comprehensive solution, blending quality features with significant benefits to enhance the management and operations of correctional facility finances and security protocols.

Key benefits

- **24/7 Availability:** Enables round-the-clock deposits for convenient access.
- **Flexible Placement:** Suitable for lobby placement for inmate friends and family and in booking areas for incoming inmates, ensuring accessibility.
- **Deposits for Commissary Accounts & More:** Allows funds to be added to an inmate's commissary account or for other similar correctional payment types.
- **Integrated Receipt Printer:** Provides immediate transaction receipts for depositors' records.
- **Depositor Photo Capture:** The built-in camera captures photos during transactions for added security and investigative purposes.
- **Nationwide Licensing:** Ensures compliant money transfer licenses across all 50 U.S. states, Guam, and the US Virgin Islands.

Corrections-grade Features

- Enclosed in 12-gauge steel housing.
- Can be bolted to the floor or attached to optional steel base plate for stability.
- Uses standard 110V power.
- Features a 3mm tempered glass touchscreen designed to endure harsh conditions.
- Primary components are modular, simplifying service, support, and upgrades.
- Option to include a coin acceptor/validator and fingerprint biometric system in addition to standard options such as a camera, credit/debit card reader, cash acceptor/validator, and receipt printer.

Manufactured in The U.S.

Manufactured at our facility in [Kingston Springs, Tennessee](#), our kiosks are engineered for quick, on-site servicing to minimize disruption. Our 100% U.S.-based maintenance team ensures quicker installation and support compared to hardware made overseas.

Device Specifications

ECU (Embedded Computer Unit)

- The ECU is pre-loaded standard with Microsoft Windows 10 64-bit
- J1900 2.0/2.42Ghz four core Intel Processor on the Bay Trail Platform Integrated on the mainboard is the 7th Generation High-Definition Graphics platform delivering 1080p 2K resolution
- Realtek Gigabit Ethernet interface
- Expandable Mini-PCIe sockets for Wi-Fi or mSATA
- Data storage is SATA 6Gb/s
- 8GB of RAM standard
- Audio – Realtek ALC662 6-
- Channel with S/PDIF headers

Touchscreen

Our touchscreens are sealed against dirt, dust and liquids and uses 10-point Capacitive (PCAP) Touch Sensor technology for extreme optical quality and 4mm tempered glass. Other features include a high-quality energy-saving LED 17". Featuring a molded front bezel to control dust and liquids and maximum resolution is 1280x1024, 5:4 Aspect Ratio with a viewing angle of +/- 89/89/89/89.

Dimensions

The deposit kiosks weigh approximately 180 lbs., and the dimensions are approximately 60" Height x 20" Width x 14" Deep.

Credit/Debit Card Reader

"Dip and swipe" reader, L1/L2 EMV certified

60mm Receipt reader

- Metal frame (galvanized/aluminum alloy)
- High print quality (200 DPI)
- Paper width: 60mm
- Paper thickness: from 60 to 80 µm
- Printing > 140 mm/sec
- USB interfaces
- Highly reliable cutter: over 1,000,000 cuts or Tear-Off system
- Sensors: head temperature, paper presence, anti-paper jamming, ticket collection, paper end and near paper end
- LED bezel

Cash Acceptor/Validator

- All cash acceptor sensors are updated with the latest SDK to prevent counterfeit deposits from being accepted by the machine
- Updates are deployed weekly to ensure all requirements are up to date
- Superior fraud Protection with enhanced sensor platform for 10x greater note coverage and recognition
- Fast transaction speed
- Easy updates and configuration
- Decreased service calls and increased machine uptime with improved jam prevention
- 4-way acceptance (faceup/down, either direction)
- LED bezel
