

# Helping Agencies Navigate to NIBRS

## Make mandatory change less stressful

The only thing promised in life is change. To comply with a National Incident Based Reporting System (NIBRS), the FBI requires law enforcement agencies to switch from a historic summary reporting system. NIBRS allows agencies to get a complete view into incidences and criminal activity in their area, which enhances the accuracy of crime statistics. These requirements also must be met to receive state and federal funding.

**NIBRS**  
National  
Incident  
Based  
Reporting  
System

## Incode public safety is ready to meet NIBRS and state-specific needs

Knowledgeable NIBRS experts will serve as partners and to walk clients through the process. Once implemented, Tyler is committed to ongoing maintenance and compliance, staying on top of evolving NIBRS requirements.

**Incode Public Safety** streamlines NIBRS by:

- **Prompting** users through each step of the process
- **Providing** an easy-to-use color-coded interface for data entry
- **Helping** users collect, store, and send reports digitally

Tyler Technologies' Incode public safety team has experience and a proven track record of implementing public safety software that makes complying to NIBRS standards easy.
