Supervision Mobile

CASELOAD INFORMATION IN YOUR POCKET

With high-risk clients and excessive case volumes, most of an officer's job is not at their desk — it's in the field interacting with clients. Available in both the Apple and Google Play Stores, Supervision Mobile is a mobile app that condenses priority case and client information from your case management system (CMS) into a simplified format for your mobile device or tablet.

From enhanced officer efficiency and streamlined communication to higher mobility and improved decision-making, Supervision Mobile is not just an extension of your CMS; it's the modern way to oversee clients under supervision, regardless of case type.

MAXIMIZING OFFICER EFFICIENCY, OPTIMIZING CLIENT OUTCOMES

Supervision Mobile enables officers to work on-the-go and be more connected with clients. Key functionality of Supervision Mobile includes:

- Caseload and client information, including GPS data, even in remote or rural areas without coverage
- Custom caseload views that enhance the focus on priority clients during field visits
- Case notes with speech-to-text technology, photo uploads, and actionable items — anything entered, uploaded, or completed in the app updates in the CMS, no Wi-Fi necessary
- Two-way chat messaging to communicate with clients on-the-go and improve accountability
- Active warrants and safety alerts for increased personal and public safety

BENEFITS

- Work on-the-go with case plans and client info available anytime, anywhere.
- Optimize case planning with smarter workflows that enhance outcomes.
- Increase officer safety with alerts and notifications when it matters most.
