

Payments for Enforcement Mobile

A One-Stop Shop for Citation Management

When public safety agencies can accept online payments for all civil citations issued, ticketing processes are streamlined from start to finish. With Tyler Technologies' Payments for Enforcement Mobile solution, all civil citation payments can be accepted at the time of ticketing through the payment portal.

Payments for Enforcement Mobile is cloud-based, which makes it accessible from any device, allowing for citations to be issued and paid anytime, anywhere. This functionality ensures ticketed individuals can easily collect their citations, make a payment the same day it was issued, and go about their day without having to worry about visiting the station or court as they would have in the past.

Maximize Electronic Payment Adoption

Payments for Enforcement Mobile users maximize electronic payment adoption with the following features:

- A secure payment platform, compliant with PCI/PA-DSS standards
- Real-time payment processing
- Acceptance of various payment methods, including Apple Pay, supported credit cards (such as Amex), and e-checks
- Ability for users to see their payment plan amount, make recurring payments, and view overall balance
- Monthly text message reminder with overall balance and payment plan amount due
- Ability to make payments from a web-enabled mobile device 24/7 and save preferred payment methods

With a flexible fee structure and no subscription or licensing costs to worry about, Payments for Enforcement Mobile means agencies can provide predictable rates for online payers. In addition, agencies have the flexibility to pass along or absorb any fees.

COLLECT PAYMENTS AT ANY TIME

24/7 access to pay citation fees
