

Electronic Monitoring Continuum

A convenient and flexible way to supervise clients on their monitoring journey

The Value of One Partner Managing the Monitoring Continuum

With options for curfew, app-based, alcohol, and ankle bracelet monitoring, supervision agencies and the judiciary can customize the electronic monitoring approach within a single solution.

- **End-to-End Monitoring:** Spanning low- to high-risk clients, customize monitoring programs to meet the unique needs or circumstances of the individual.
- **Device Agnostic:** Easily mix, match, and switch tracking devices without disrupting the supervision continuum.
- **Case Management System (CMS) Integration:** Parameters, zones, policies, conditions, and locations sync to and live in the CMS, no matter the device.
- **Evidence-Based Practices:** A progressive monitoring approach with various tracking devices can enhance effectiveness of supervision, driving client compliance, communication, and outcomes.
- **Monitoring Support:** Get the hardware, software, and support needed to reliably monitor every client.
