

# IMPROVE ACCESS to Court Records

## A Portal for Case Records & Documents Across Multiple Jurisdictions

re:Search provides a more efficient way for attorneys, judges and other constituents to access the information they need — anytime, from any place, on any device. It allows you to offer a web-based portal that provides immediate and secure access to a consolidated database of case information. This uniform solution provides a simple, consistent way to view and obtain case records and documents from multiple jurisdictions.

### COURTS

- Increases transparency and access to court information
- Simplifies access across multiple counties, regardless of case management system
- Reduces the need to print documents for judges
- Offers a revenue acquisition opportunity for courts
- Reduces paper, photocopies, postage and other costs

### ATTORNEYS

- Establishes accessibility through a single portal to a centralized database
- Prevents the need to learn different systems across the state
- Saves time and money by eliminating visits to the clerk's office to access records and documents
- Provides immediate access to full case information 24/7/365

### JUDGES

- Provides case information and documents from multiple jurisdictions
- Allows secure access from any device including: PCs, Macs, tablets and smartphones
- Prevents the need to learn multiple systems across multiple jurisdictions
